

XTONE

XTONE

BEYOND THE LINE

Creativity is the force that lets us turn ideas into tangible realities, driving an evolution that has no limit. Design any surface or volume from the synergy between wit, evolution, and material, to develop all types of continuous surfaces: worktops, counters, furniture, and facades among other applications. Concepts that come to life with the XTONE sintered compact.

La creatividad es la fuerza que permite ejecutar ideas en realidades tangibles, impulsando una evolución que no tiene límite. Diseñar cualquier plano o volumen a partir de la sinergia entre ingenio, evolución y materia para desarrollar todo tipo de superficies continuas: encimeras, mostradores, mobiliario y fachadas entre otras aplicaciones. Conceptos que cobran vida con el compacto sinterizado XTONE.

La créativité est la force qui permet de matérialiser les idées dans des réalités tangibles, stimulant ainsi une évolution sans limites. Concevoir un plan ou un volume quelconque à partir de la synergie entre l'ingéniosité, l'évolution et la matière pour développer toutes sortes de surfaces continues, parmi lesquelles des plans de travail, des comptoirs, des meubles et des façades. Ces concepts prennent vie avec la surface compacte frittée XTONE.

APPLICATIONS

Size is no longer a constraint, but rather lines that are designed in the creation of the space. The development of the large size, its different thicknesses and finishes, allows new ideas and shapes to be executed in tangible realities, providing complete creative freedom. Synergy between ingenuity and matter to develop all types of plans.

El formato ya no es una limitación, sino líneas que se conciben en la creación del espacio. La evolución del gran formato, sus diferentes espesores y acabados, permite ejecutar ideas y formas en realidades tangibles, ofreciendo total libertad a la creatividad. Sinergia entre ingenio y materia para desarrollar todo tipo de planos.

Le format n'est plus une limite, ce sont des lignes que l'on conçoit dans la création de l'espace. Grâce à l'évolution du grand format, à ses différentes épaisseurs et finitions, il est possible de créer des idées et des formes dans des réalités tangibles, ce qui donne une liberté de créativité totale. Une synergie entre l'ingéniosité et la matière pour développer toutes sortes de plans.

XTONE allows you to make a custom design for each project, adapting its format to the needs of the space. Modulations and cuts are no longer a limitation, achieving completely unique and exclusive settings.

XTONE permite realizar un diseño a medida para cada proyecto, adaptando su formato a las necesidades del espacio. Las modulaciones y cortes ya no suponen ninguna limitación, consiguiendo ambientes completamente únicos y exclusivos.

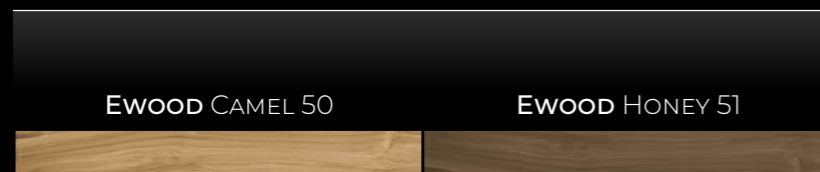

XTONE permet de réaliser un design personnalisé pour chaque projet, en adaptant son format aux besoins de l'espace. Les modulacions et les coupes ne sont plus une limitation, permettant d'obtenir des environnements complètement uniques et exclusifs.

CLEANING POST-INSTALLATION

After the ceramic sheets have been laid, they must be protected to prevent them from getting damaged until all onsite work has been completed.

Before proceeding to give the tiled surface a final clean, wait for a prudent length of time (approximately 24 to 48 hours) so that the grouting material can set properly. In the case of polished porcelain sheets, once they have been grouted, they should be cleaned with a damp sponge before the grout can harden.

In general, a neutral or alkaline detergent like Acid Net should be used to clean away cement or grout residues. If epoxy-based grouts are used, clean away any remains as soon as the joints have been grouted, using a sponge and plenty of clean water. Then clean the surface thoroughly with an alkaline detergent, following the instructions on the product label. To care for the tiled surface, use a neutral detergent. To clean and care for the tile joints, use products specifically designed for this purpose.

EVERYDAY CLEANING AND CARE

Tras la instalación del material cerámico es imprescindible la protección del mismo para impedir posibles daños hasta la finalización de la obra.

Antes de realizar la limpieza final de obra es necesario respetar un tiempo de espera prudencial de 24-48 horas aprox., con el fin de que tenga lugar el correcto fraguado del material de rejuntado. En materiales porcelánicos pulidos, una vez rejuntado el material debe limpiarse con una esponja húmeda antes que el material de rejuntado se haya endurecido.

Como norma general se recomiendan productos ácidos tipo Acid Net teniendo en cuenta que no entren en contacto con los metales, siempre diluidos, para la limpieza de restos de cemento, juntas cementosas... En el caso de utilizar para el rejuntado productos epóxicos, eliminar los residuos inmediatamente después de las operaciones de colocación, utilizando una esponja y abundante agua limpia. Realizar a continuación una limpieza a fondo con la ayuda de detergentes alcalinos. En el mantenimiento del revestimiento utilizar detergentes neutros, y en la limpieza y mantenimiento de las juntas, utilizar productos especiales a tal fin.

Après l'installation du matériau céramique, il est indispensable de protéger le matériau pour empêcher d'éventuels dommages jusqu'à l'achèvement des travaux.

Avant de réaliser le nettoyage final du chantier, il est nécessaire de respecter un temps d'attente prudentiel d'environ 24-48 heures, pour permettre la bonne prise du matériau de jointoiment. Pour les matériaux porcelainés polis, une fois le jointoiment réalisé on devra nettoyer le matériau à l'aide d'une éponge humide avant que le matériau de jointoiment ne durcisse.

En règle générale, l'on recommande des détergents neutres ou basiques comme par exemple Basic Gel pour le nettoyage des restes de ciment, mortier de jointoiment... En cas d'utilisation pour le jointoiment de produits époxy, éliminer les résidus immédiatement après les opérations de pose, en utilisant une éponge et de l'eau claire en abondance. Réaliser ensuite un nettoyage à fond à l'aide de détergents alcalins, en veillant à suivre les indications indiquées sur les étiquettes des produits utilisés. Pour l'entretien du carrelage céramique, il est conseillé d'utiliser des détergents neutres, et pour l'entretien des joints, utiliser des produits spécifiques à cette fin.

To remove everyday dirt, clean the surface with a flat mop, water and a neutral cleaner in the dilution recommended by the manufacturer or bioalcohol. Butech manufactures a series of cleaning products. For information about them, visit www.butech.es. Afterwards, clean the surface with a dry cloth with no wax additives.

Polished X-TONE will require greater care, particularly plain or pale-coloured ones, since the polishing process slightly alters the porosity of the sheets. As a result, a moistened, well-rinsed cloth should be used for everyday cleaning.

En el caso de la limpieza de suciedad en general, es recomendable limpiar la superficie con una disolución de lavado, utilizando un bioalcohol o limpiador neutro en la dosis de uso recomendada por el fabricante. Butech posee una serie de limpiadores, para consultar dichos limpiadores puede acceder a su página www.butech.es. Seguidamente, es aconsejable usar un paño seco sin aditivos cerosos.

En el caso del X-TONE en acabado pulido se requiere una mayor atención especialmente con los colores lisos y claros, ya que el proceso de pulido altera ligeramente la porosidad con respecto al porcelánico natural, por ello, para su limpieza diaria se recomienda un paño ligeramente humedecido.

Pour nettoyer la saleté en général, il est conseillé nettoyer avec une dissolution de nettoyage, en utilisant un nettoyant neutre dans la dose d'utilisation recommandée par le fabricant ou bioalcohol. Butech possède une série de nettoyants, consulter ces nettoyants en accédant à la page www.butech.es. Ensuite, il est conseillé d'utiliser un chiffon sec sans additifs de cire.

Dans le cas De l'X-TONE poli il est nécessaire d'être plus vigilant, tout particulièrement avec les couleurs unies et claires, étant donné que le procédé de polissage altère légèrement la porosité par rapport au grès porcelainé naturel, ce pourquoi l'on recommande pour son nettoyage quotidien un chiffon légèrement humidifié.

REMOVING SPECIFIC STAINS

The tiled surface might occasionally get stained through contact with certain substances (coffee, paint...) or as a result of spills.

Everyday cleaning methods might not be sufficient in such cases, and specific procedures will be needed depending on the type of stain.

Time is of the essence in removing stains and so the area in question should be cleaned as promptly as possible to prevent the substance from drying and becoming harder to remove.

Ocasionalmente, en la superficie de los recubrimientos pueden existir restos diversos, al derramarse o entrar en contacto con determinadas sustancias (café, pinturas...).

Algunos productos pueden no ser eliminados mediante las operaciones usuales de limpieza y debe recurrirse a procedimientos específicos, en función de su naturaleza.

Es muy importante el tiempo que permanece la sustancia sobre la superficie de la pieza, por lo que es recomendable limpiar la zona lo antes posible; de este modo evitará que se seque y se limpiará con mayor facilidad.

Occasionnellement, il peut exister sur la surface des revêtements des restes divers qui auraient pu se répandre ou entrer en contact avec certaines substances (café, peintures...).

Certains produits peuvent ne pas s'éliminer à travers les opérations habituelles de nettoyage et l'on doit alors recourir à des procédés spécifiques, en fonction de leur nature.

Le temps pendant lequel la substance reste sur la surface de la pièce a une grande importance, c'est pourquoi il est recommandé de nettoyer la zone le plus rapidement possible, pour éviter ainsi qu'elle sèche et la nettoyer plus facilement.
