

I. Installation Notice

1. Install water supply lines in accordance with this manual.
2. Floor drain should be installed in the location of the faucet.
3. Excluding the valve, the other exposed parts must be installed after the completion of house interior decoration in case paint or other chemicals erode the faucet surface. Notice that the protection sheath on the valve cannot be taken off before installing mounting parts.
4. Clean pipes to get rid of mud, sand or other debris blocked in pipes.
5. Check whether the threads can be matched. Otherwise, too strong force applied to the wrench will damage the faucet.
6. After installation, check all the joints to make sure they are firmly connected. Then keep water flow. Turn on and off repeatedly to ensure there is no leakage around the joints. At this stage, the product is ready for normal use.
7. Keep the manual to the user.

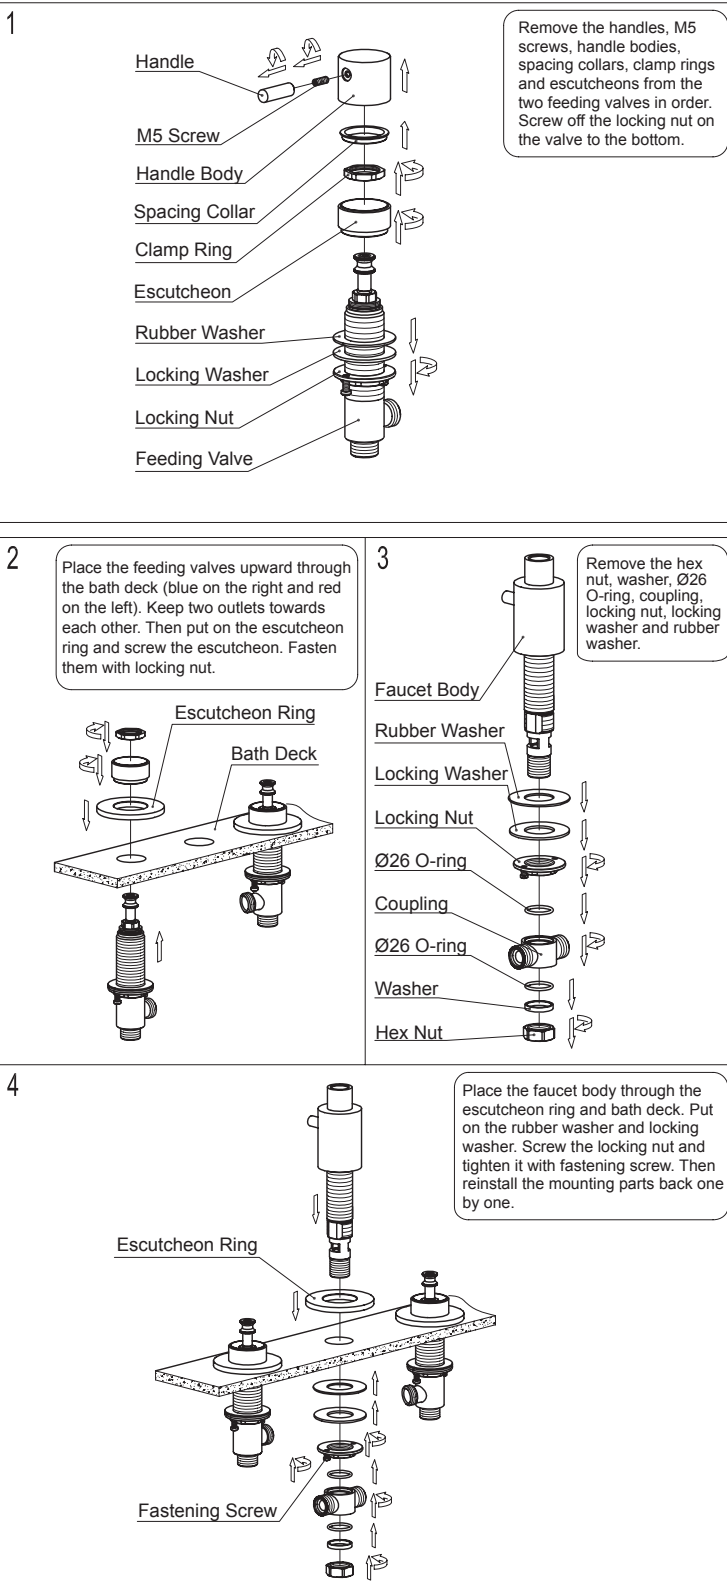

II. Operation Notice

1. The product is used between water pressure 0.05~1.0MPa, water temperature 4~90℃.
2. Do not hang heavy things on the faucet.
3. Make sure the faucet is off when no water comes out of it (especially when nobody resides in the house or during the period of decoration or the absence of water).
4. Always clean the surface of faucet to keep it bright.
Attention: Please do not use inappropriate tools such as sharp brushes, rough sponges, scouring pads or corrosive detergent to clean the faucet, and we do not recommend that you use the detergent sold in the market, because its formula is changing frequently. Please clean the faucet by wet cloth and soapy water after each time of usage. Then rinse the soap out with clean water and dry with a soft cotton cloth.
5. When the room temperature drops to below 0℃, take necessary measures (such measures as keeping faucet warm and closing windows) to prevent the faucet from being frozen or even broken (especially when windows kept open for air ventilation while nobody resides in).
6. First turn on cold water, then hot water. To avoid scalding, regulate the water temperature before washing or showering and do not touch the faucet of hot water part.
7. Do not disassemble the product unless you are an expert.

The installation diagram:

5

6

7

Remove the locking nut, locking washer and rubber washer from the shower holder.

8

Place the shower holder through the escutcheon ring and bath deck hole. Reassemble the parts back one by one. Tighten the locking nut with fastening screw.

9

Connect the hand shower and hose.

10

Place the hose through the shower holder.

11

Connect the faucet body and hose with steel braided hoses. Position the balance block in between.

12

Take off the protection sheath from the spout.

13

Insert the spout into the faucet body and tighten them with M6 screw.

13

Finish the installation (turn on water for inspection)
